Coordination Center

Evening Summary

Date/Time Stamp: Saturday, September 05, 2015 - 8:52 PM

Weather Summary

...Cool and More Humid this Weekend...

Clouds and areas of showers will linger in northern areas along with much higher humidity levels. Showers should start tapering off later today into Sunday.

Another weak disturbance late Monday in the north could keep spotty shower activity going in Idaho...otherwise a gradual return to near normal temperature/humidity by the middle of next week. Stronger high pressure may build in late next week with a return to above normal temperatures and unseasonably low humidity levels.

Preparedness Levels

Current:

Great Basin	3
National	5

Great Basin Fire Activity: 15 fires for 4 acres (#s from FAMWEB SIT Report)

Large Fire Growth: 17 acres

Large/Emerging Fire Summary:

fires occurred
overnight

Resources:

- IMT 2 Wilcox & DeMasters available
- NV IMT 3 Wyatt will be mobilizing to Cougar Creek in WA
- Competition for resources has decreased and initial attack resources have become more readily available.

Great Basin Fire Potential Summary

Overall fire danger has moderated and fuels should steadily moisten the next several days especially across Idaho and Ern Utah. However, the combination of moderate winds and moderately low RH across Ern Nevada and Wrn Utah will BRIEFLY increase fire potential, at least while the winds are at their strongest thru early afternoon.

For more detail, see [Great Basin 7-Day Fire Potential Outlook](#)
